

« Due to the **unique design** of its **mobile** and **removable hatch**, the Cockerill® CPWS Gen. 2 is **multi-mission** capable. It can accommodate **25mm and 30mm** calibre cannons and an **anti-tank missile** capability. Last but not least, this light system allows for **under-armour reloading**, thus maximizing the **protection** of the crews. »

**Thierry Renaudin**  
President of CMI Defence
